

MIDI Magnet[™]

Post Magnet Plate

Designed for 96-well Deep Well MIDI Microplates
.... to Power Your Next Generation Sequencing

The Alpaqua MIDI Magnet Plate is designed for use with the Abgene[™] 0.8 mL Polypropylene 96-well deep well storage plate (AB-0859), often referred to as the “MIDI Plate”, and recommended in many NGS protocols. The 24 post magnets sit at the cross section of four wells, forming well-defined pellets at the top edge of the magnet, suitable for both manual and automated pipetting.

Accelerating Genomic Applications

- Next Generation Sequencing
- Sample Preparation
- Library Construction
- PCR Clean up

MIDI Magnet™ Plate

With Integrated Spring Cushion Technology

Supporting Next Generation Sequencing

- 24 strong post magnets for rapid and highly efficient magnetic bead separation
- For use with Abgene 96-well deep well storage plates AB-0859 or AB-0932
- Compatible with manual or automated separations
- Integrated spring cushion technology* for maximum sample recovery, improved pipetting accuracy & fewer tip occlusions

Ordering Information

Buy online at www.alpaqua.com/store, or place your order by phone, fax, or email at sales@alpaqua.com.

MIDI Magnet™ Plate

The Alpaqua MIDI Magnet™ Plate employs 24 strong post magnets and is compatible with Abgene 96-well deep well storage plates (AB-0859 & AB-0932).
